

Day 12 Daily Challenge: Shark Infested Waters Game

Parent/Carer permission required.

1. Check out this website and find out where sharks live - this is where your desert island could be.

<https://kids.britannica.com/kids/article/shark/353766>

2. Decide on the type of sharks you will find. Not all sharks are not dangerous to humans. I have had the luck of swimming with black tipped reef sharks, close up. Fortunately they weren't interested in eating me until I found myself in the middle of a shoal of fish; this is not to be recommended as the sharks mistook me for food and made a beeline for me with mouths wide open... Luckily I'm still here to tell the tale.

3. Imagine your sitting room or garden is shark infested water. You have been dropped off on a rock and have to navigate your way around the rocks to the beach of the desert island.

You may want to set up some 'stepping stones' using furniture, etc.

Can you move around your garden or sitting room without stepping on the floor?
